PROPOSAL

Introduction

- As a qualified practitioner of Traditional Chinese Medicine (TCM) from Korea, I am in the process of establishing a wellness centre in Chennai focused on holistic health and preventive care. The centre aims to provide high-quality TCM treatments, combining my expertise in acupuncture, tuina, herbal medicine, and rehabilitation therapies.

Current Status

- The location for the wellness centre has already been secured and prepared for operation. Once administrative procedures and staffing arrangements are finalized, the centre is planned to commence operations by February.

Initial Patient Focus

- Initially, the centre will primarily serve Chinese and Korean patients residing or visiting Chennai, offering familiar TCM therapies in a culturally sensitive environment.

Future Expansion Plans

- I plan to extensively study Ayurveda, Siddha, and other Indian medical systems, integrating these practices with TCM to develop a comprehensive, holistic approach tailored for a diverse patient base.
- Upon attaining proficiency in local languages, the center will gradually expand services to include local Indian patients, promoting cross-cultural wellness practices.
- The center will also employ qualified Ayurvedic doctors to provide authentic Ayurvedic therapies alongside TCM treatments.

Opportunities and Benefits

- Provides a unique opportunity for patients interested in acupuncture, herbal therapies, and holistic rehabilitation. It also acts as a platform for cross-disciplinary learning, where TCM and Indian traditional medicine can be combined for innovative patient care.
- This is a great opportunity for those interested in acupuncture treatment or looking to gain hands-on experience while working.
